

WORK SMART WITH LOGIQC

ProCare and LOGIQC Pty Ltd have partnered to provide GP practices with affordable access to the LOGIQC software accreditation solution.

Sign up by 31 March 2018 to get a 50% ProCare subsidy

LOGIQC is cloud-based software specifically designed to support practices to meet accreditation requirements and drive improvement.

"LOGIQC WILL HELP STREAMLINE THE DOCUMENTATION AND AUDITING BY HAVING EVERYTHING IN ONE PLACE TO MAKE THE ACCREDITATION PROCESS A LITTLE EASIER."

NORTH AUCKLAND PRACTICE

"LOGIQC IS A ONE-STOP-SHOP FOR MANAGEMENT OF ALL REGISTERS AND ALLOWS FOR EASIER MANAGEMENT OF TASK FOLLOW UP, EASY ACCESS TO ALL DOCUMENTS FOR STAFF AND GOOD DOCUMENT CONTROL FEATURES."

CENTRAL AUCKLAND PRACTICE

Reduce the time and effort required to achieve and maintain compliance with the RNZCGP Foundation and Aiming for Excellence Standards

In a recent survey of practices who have implemented LOGIQC, 88.9% of practice staff surveyed felt that LOGIQC will save time in preparing for and maintaining compliance with Foundation and Aiming for Excellence standards.

The first 20 practices to sign up by 31 March 2018 will receive the following great deal, equivalent to 50% off for the first 12 months:

- \$50/month (enrol. up to 2500)
- \$75/month (enrol. 2500 - 8000)
- \$100/month (enrol. >8000)

After the 12 month subsidy period you can choose to continue with the system or exit. There's no contract lock-in.

ONLY 7 PLACES LEFT

LOGIQC is cloud-based software specifically designed to support practices to meet accreditation requirements and drive improvement.

- **Simplify compliance and save time.** Organise key tasks, documents and reporting processes and get email reminders when things need to be done.
- **Control and track risks and hazards.** Identify, monitor and mitigate clinical and business risks and hazards and ensure compliance with legislation.
- **One simple system for incident and complaints management.** Staff can easily record issues and notifications are automatically sent to the relevant people.
- **Organise and protect documents.** Ensure your policies, procedures and forms are protected, version controlled and easily accessed.
- **Drive improvement.** Schedule required audits, get automatic reminders, and generate improvement actions.
- **Accreditation ready.** Pre-configured to meet the requirements of the RNZCGP Foundation and Aiming for Excellence standards.
- **Trend reports.** LOGIQC provides graphical trend reports on reported incidents and complaints and data can also be exported to Excel.
- **Secure NZ data hosting.** LOGIQC is hosted in the 'cloud' by Vocus Communications in Auckland and with up-time reliability of >99% and data transmission encrypted with SSL technology, LOGIQC meets industry standards for data security.

All data in the system is backed up daily and your practice has complete control over who can access data, records and documents.

LOGIQC QMS and the QA2QI tool

If you use LOGIQC QMS throughout the year to store documentation and manage compliance, much of the evidence required to support CORNERSTONE® accreditation and Foundation Standard requirements will already be in your system.

The RNZCGP is aware that users of LOGIQC QMS may choose to simply enter the unique LOGIQC ID# into the evidence column in the QA2QI on-line tool instead of uploading actual documents.

This means that evidence already uploaded to your LOGIQC QMS does not have to be re-uploaded to the QA2QI on-line tool.

LOGIQC QMS also comes with a free user account for assessors which means you can provide online access for assessors to review your evidence prior to the on-site assessment.

Accreditation Module option

LOGIQC's new Accreditation Module can be pre-loaded with the requirements of standards such as *Aiming for Excellence 2016* and *Urgent Care 2015* giving you one central system for documentation and compliance actions.

While the LOGIQC QMS handles document control for your policies and procedures, the Accreditation Module goes beyond documentation by linking compliance activities such as practice audits, risk management and credentialing to the corresponding requirements of standards.

This means that what you do on a day-to-day basis to manage your practice is automatically recorded against corresponding indicators and criteria within the relevant standard.

Note: LOGIQC QMS does not replace the College's QA2QI self-assessment tool, it simply becomes a source of where evidence of compliance is located.

Accreditation Module - Key points

- Save time preparing for accreditation - no need to upload documentation to the QA2QI online tool
- Reduce duplication by keeping all your policies, procedures and records of evidence in one place
- Self-assess your own compliance with standards at anytime throughout the year
- Link records such as training certificates, APC's and audits to each indicator in the standard
- Free login account for assessors to review your policies and procedures online
- Generate evidence reports showing how your practice complies with CORNERSTONE®, Foundation and Urgent Care standard requirements
- Generate and export trend reports to Excel

Optional extras

- Compliance register
- Training register
- Licensing/credentialing register
- Contracts register
- Repairs/maintenance register
